## Experience

**Home Depot - Owasso, OK**                    September 2023 - Present

Freight Team Member

- Achieved an average of 150-220 cartons unloaded in 2 hours, exceeding the target by 275% to 450% based on the required 40 cartons per hour
- Improved stocking efficiency by optimizing the loading and unloading process

**Leon's Mobile Detailing - Owasso, OK**                    April 2023 - Present

Owner/Operator

- Kept detailed records of all income and expenses, which improved financial tracking and contributed to a 20% increase in profitability
- Improved efficiency by reducing service time by 20% through process optimization
- Implemented targeted advertising strategies that led to a 30% increase in clientele

## Projects

**3MEALS: Frontend and Backend Developer**                    April 2024

*https://github.com/jacobleon2117/3meals/tree/Dev*

- Collaborated on a dynamic recipe discovery platform, where I developed the frontend and backend
- Integrated the Edamam API to enable users to browse and save personalized recipe collections, enhancing user engagement and experience

**USAR APP: Designer and Developer**                    September 2024 - Present

*https://github.com/jacobleon2117/USAR-APP*

- Currently designing and building a web and mobile application tailored for the Urban Search and Rescue Foundation for the Tulsa members
- Each team member has access to their own dashboard featuring their dog's information, tasks, and a schedule

**Atlas Headphones: Frontend Developer**                    July 2024

*https://github.com/jacobleon2117/atlas-smiling-school*

- This responsive front-end UI for a headphones e-commerce site arranges four elements in a row on PCs, switches to a two-by-two grid on tablets, and stacks them in a column on mobile
- The navbar transitions to a hamburger menu with a dropdown at mobile size, using media queries to ensure adaptability across devices
